

Adding a new
dimension to
education

ENGINEERING WORKSHOPS

Unlock your child's creativity and critical thinking through **hands-on workshops** led by professional engineers from diverse fields. Each session guides students through the real-world engineering process—from concept to design, building, and testing.

A New Dimension in Learning . Our workshops are not just educational—they're edutainment. Through interactive challenges based on real-life scenarios, students learn how engineers solve real problems.

Plan + Build + Test + Improve = Engineering Workshop

What makes our workshops unique?

No ready-made kits—just open-ended challenges that spark innovation.

Build, test, and improve real prototypes.

Progress through levels tailored to your child's age and ability.

Apply math and physics in fun, meaningful ways.

Gain valuable skills in design, measurement, and tool use.

What skills will your child learn?

Explore different branches of engineering.

Tackle real-world problems with creative solutions.

Think critically and independently.

Understand and apply STEM concepts.

Design, measure, and prototype like an engineer.

Guided by Real Engineers — Our mentors bring their professional experience to every workshop, showing kids how engineers think and work in the real world.
