

**Adding a new
dimension to
education**

STEM Challenges

Fun filled activities that help students test engineering aspects. Science concepts and learn about modern tech in an engaging environment.

Enroll your child today!

A New Dimension in Learning . The challenges vary between different fields of engineering, science and coding. In doing so, we are building up a new generation of engineers - one edutainment experience at a time.

Science + Tech + Engineering + Math = STEM

The children will:

- Solve exciting, hands-on engineering challenges
- Code and design their very own video games
- Build small but impressive engineering projects
- Learn how to safely use a variety of tools
- Experiment with fun science activities and real-world problems
- Work in teams to brainstorm and create innovative solutions
- Present their ideas and projects with confidence

What skills will your child learn?

- A strong understanding of basic engineering concepts
- The fundamentals of coding and game development
- How to experiment like a scientist—ask questions, test ideas, and improve results
- Problem-solving, critical thinking, and creativity
- Teamwork, communication, and presentation skills
- Confidence in using different tools and technology
- Time management and project planning

Guided by Real Engineers — Our mentors bring their professional experience to every workshop, showing kids how engineers think and work in the real world.
